A surge arrester is a device to protect electrical equipment from over-voltage transients caused by external (lightning) or internal (switching) events. Also called a surge protection device (SPD) or transient voltage surge suppressor (TVSS), this class of device is used to protect equipment in power transmission and distribution systems.

Surge arrester - Wikipedia This rating, as shown in table 4, indicates the maximum-level switching surge this arrester can handle without out failing. Historically, this test was a one- or two-impulse test, depending on the supplier. The 2012 standard rectified this discrepancy. This rating applies only to station class arresters and not distribution arresters.
